

Intervention of CIOFF Youth in swiss folk dance groups

With CIOFF Youth Switzerland Suisse active again, the new committee was set up to introduce itself to the various folk dance groups in Switzerland in order to make CIOFF in general and more specifically CIOFF Youth known.

Moreover, the intention of these meetings in the groups was to present our projects and our activities that would take place during the year in order to allow a collaboration between the CIOFF Youth and the Swiss groups.

We also had the opportunity to meet with the various chairs / members / monitors, .. groups and we were able to discuss the differences and functioning of the various groups. More often than not, we did our speech during a rehearsal and this allowed us to learn the dance style of each group, followed by a small well-deserved aperitif. All the groups were delighted to welcome us and share these evenings with us. They were interested in our presentation and very open to future collaborations. They found that CIOFF Youth could be a support and a source of contact for them in order to organize different activities with young people in order to raise awareness of Switzerland's culture, folklore and traditions.
